Summary

Full Stack Developer with experience in leveraging Typescript and React to craft robust and user-centric solutions. Proficient in seamlessly integrating, testing, and debugging front-end and back-end technologies such as React, Django, Node.js, Tailwind, and PostgreSQL. Adept in building features and apps with user authentication and authorization, mobile responsive design, and deploying solutions to cloud platforms. I constantly evolve my skills to ensure cutting-edge development.

Skills

Programming Languages: TypeScript, JavaScript, Python, CSS3, HTML5

Frameworks and Libraries: React, Next.js, Django, Django REST Framework, Node.js, Express, RESTful API's, Tailwind

Database Management: PostgreSQL, MongoDB

Testing and Deployment: Jest, Mocha, Chai, MongoDB Atlas, Heroku, Netlify

Experience

General Assembly

March - May 2023

Software Engineering

Remote

- **CineSearch:** <https://cinesearch-mavericks.netlify.app/>
 - Developed and maintained server-side logic using MongoDB, Node.js, Express
 - Designed and implemented database schemas and queries using a NoSQL Database, ensuring efficient data storage and retrieval.
 - Collaborated with a team of front-end developers to integrate user interfaces with back-end functionality, resulting in a seamless user experience.
- **Recipe Finder:** <https://project-2-auth-aw.herokuapp.com/>
 - This was a individual deployed full stack RESTful app built with Node.js and PostgreSQL
 - Implemented authentication and authorization mechanisms using JWT (JSON Web Tokens) for secure user access to protected resources.
 - Incorporated an API and wrote semantically clean HTML, CSS, and back-end code
- **Goal Hopper:** <https://awellsbiz.github.io/Project-1/>
 - Endless runner game built using HTML 5 Canvas, CSS, and Java Script
 - Designed logic for winning
 - Deployed online via Github

Delilah

February 2021-Present

Lead Mixologist

West Hollywood, Ca

- Utilized the LightSpeed POS system to analyze sales data, customer preferences, and returns, identifying top-selling drinks and low-performing items.
- Utilized the data-driven insights to curate a seasonal menu every quarter, resulting in a 15% increase in overall beverage sales.
- Developed and nurtured strategic relationships with premium spirit brands, collaborating closely to create signature cocktails that aligned with their brand identities. Successfully launched new brand-focused cocktails, resulting in a 20% increase in sales for partnered brands and enhanced customer engagement.

Education

General Assembly

Software Engineering Immersive Student - Remote

March 2023-May 2023

The American Musical and Dramatic Academy

Acting Conservatory Student - Los Angeles, Ca

June 2011 - October 2012
